BLEHM
QUALITY - DEPENDABILITY
PLASTICS

BP8002 / BP8003 are water-based latex-rubber adhesives used for the rapid build-up of styrofoam foundry patterns.

BP8003 is a natural cream color, while BP 8002 contains a green dye for easier visibility. They have been specially formulated and are fully approved for the "Full Mold Foundry Process" of direct metal casting using styrofoam patterns.

BP8002 / BP8003 have a light-bodied viscosity together with an anti-sag property which makes them quick and easy to apply. They will not soften, dissolve, or etch the styrofoam surface, but will rapidly penetrate into the pores of the styrofoam so that the fully cured bond will be stronger than the styrofoam itself. The bond will also have excellent resistance to the aging effects of oxygen, moisture, and heat.

BP8002

Styrofoam Pattern Adhesive

BP 8002 is a water-based latex-rubber adhesives used for the rapid build-up of styrofoam foundry patterns. BP 8002 contains a green dye for easier visibility. BP8002 has been specially formulated and fully approved for the "Full Mold Foundry Process" of direct metal casting using styrofoam patterns.

Features:

Viscosity: Brushable thixotropic
Weight (per gal.): 7.6lbs
Base: Liquid Latex dispersed in water
Color: Green

BP8003

Styrofoam Pattern Adhesive

BP 8003 is a water-based latex-rubber adhesives used for the rapid build-up of styrofoam foundry patterns. BP 8003 contains a natural cream color to blend with styrofoam. BP8003 has been specially formulated and fully approved for the "Full Mold Foundry Process" of direct metal casting using styrofoam patterns.

Features:

Viscosity: Brushable thixotropic
Weight (per gal.): 7.6lbs
Base: Latex rubber dispersed in water
Color: Cream

Concrete Mold with BC8003

Excellent for bonding styrofoam
or for layered mold making
